COSC 480 Cloud Computing
Fall 2019

REPOSITORY: <https://github.com/xfgoovaerts/DroneProjectPartOne>

WHAT WE GOT TO WORK:

- Can connect to DSE cluster and drone at the same time
- Can write data into 3-node cluster in EC2 instance

WIKI:

The instructions we followed to create both the single-node local database in a docker cluster and the three-node AWS cluster were included in report 2. The instructions to open the cluster to remote access on EC2 and connect with python are in report 3.

1. CONNECT TO DRONE AND WIFI FOR CLUSTER AT SAME TIME

1. Connect laptop wifi to drone
2. Plug in wifi adapter dongle
3. Computer should then connect to the wifi
4. Start program
 - a. Computer should be able to connect to cluster and drone at same time
